ABOUT US **THIS IS ALWUD**

Alwud is a leading manufacturer in India, who produces composite products that As a leading plastics recycler and producer of green composite, we manufacture in an energy efficient way, virtually waste- free production process. Just as our name shows, we are leading our industry towards better designs, quality, products as well as customer experiences. We believe we can become Your lifelong partner

ALWUD **MISSION**

We work for making our planet more comfortable by being committed to the R&D of new eco-friendly material.

VALUE **EXCELLENCE**

Never stop pursuing more excellence in product quality and performance.

ALWUD **VISION**

We are dedicated to leading in our industry. We facilitate every staff can realize working ability improvement by self efforts on the platform provided by Alwud. We motivate every staff to lead happy life that is affordable to housing, automobile, good education for offspring and a healthy & happy life for parents.

INNOVATION

Always treat technology innovation as our core.

DEDICATION

Always put dedication in every moment of work.

LIABILITY

Stay true to the liability for society and every staff

WHY **ALWUD?**

ENVIRONMENT RESPONSIBLE

Manufactured with over 80% recycled materials and without any toxic substances. Product can be 100% recycled.

GLOBAL SUPPLIERS

Products are not only widely used in India, but also used to worldwide and exported to other countries.

CUSTOMIZED AVAILABLE

Personalized your requirements by enterprise-owned Industry Design Center & Technology Center.

PROFESSIONAL SERVICES

An outstanding sales team offers you professional and considerate services during the stages before and after sales.

EXPERIENCE PRODUCER

Worked as a producer for more than one decade, leading the industry with rich manufacturing experience.

RELIABLE QUALITY

Focus on global market, apply strict international manufacturing standards.

ALWUD ACP LOUVER

ACP louvers are architectural elements used in building facades for ventilation and sun shading. They are made of aluminium composite panels, which consist of two thin aluminium sheets bonded to a non-aluminium core material, usually polyethylene

The louvers are designed to allow air to flow through them while blocking direct sunlight, reducing heat gain and improving energy efficiency. They are commonly used in commercial and institutional buildings, such as offices, hospitals, and schools. ACP louvers come in various shapes, sizes, and colors to match the building's design and aesthetic. They are also durable, lightweight, and easy to install, making them a popular choice for modern architecture.

ACP LOUVER Technical Details

SERIES : 3000

625mm(W) x 2440mm(H),
Thickness: 30mm
Tolerance: ± 5 mm

SERIES : 5000

770mm(W) x 2440mm(H),
Thickness: 30mm
Tolerance: ± 5 mm

**Customised length is also available (up to 3660mm).*

***Actual colours may vary from the pictures shown in the brochure.*

*Colour may vary from batch to batch $\Delta \pm 5$

To avoid colour variation, place an order the total quantity for one particular building.

To avoid possible reflection of light variation, install panels in the same direction as marked on the protective film.

*Incase of any manufacturing fault, the liability will be limited only to the Product.
